

Systematic and systematic-style review service charter

The Southern Cross University Library's systematic review support is based on close collaboration between researchers and librarians. Please work your way through our [library guide](#) before making an appointment with a librarian: <https://www.scu.edu.au/library/research/faculty-and-college-librarians/>

Service levels	General (Student assessment)	Academic (Publication)	Premium (Collaborative team)
	Up to two research consultations	Up to three research consultations	Negotiated with library management
	N/A	Acknowledgement of librarian's contribution is recommended*	Co-authorship with librarian is required*
Provide advice on finding existing systematic reviews			
Recommend databases for your research area			
Provide advice on grey literature sources			
Support reference management using EndNote			
Provide advice on documenting search results (e.g. PRISMA)			
Provide advice on the development of database searches			
Edit search strategy based on results			
Run searches and extract results			
De-duplicate references and prepare an EndNote library			
Contribute to the Methods section of the paper			

Adapted, with permission, from the [Systematic Review Service Charter](#) developed by the University of Sydney Library.

Limitations at Premium level:

- We do not conduct hand searching (or grey literature searching)
- We do not screen articles
- We do not develop or register protocols

* The acknowledgement and co-authorship criteria are based on the SCU Research Authorship and Publications [Policy](#), and [Procedures](#), and the [Australian Code for the Responsible Conduct of Research 2018: Authorship](#).
